

Dear Sir or Madam,

DESOI GmbH is celebrating its 45th anniversary this year!

"We are proud of what we have achieved and look forward to continuing to drive innovation and offer our customers high-quality products and services in the future," says Martin Desoi, the company's owner and managing director.

In this context, we don't want to withhold the latest information from you.

Your Desoi Team

The popular DESOI web seminars start on 12th November!

REGISTER NOW FOR FREE!

It's that time again. Immerse yourself in the world of injection technology and benefit from our expert knowledge from over 40 years of experience.

What can you expect?

- Current trends and technologies
- Practical tips from our experts
- Interactive Q&A sessions

Convenient online training and valuable insights. We look forward to your participation!

B-STING® joint injection needle: New area of application for subsequent sealing in expansion joints

The tried-and-tested B-STING® joint injection needle has not only proven itself in the subsequent sealing of tubbings. Now another promising field of application is opening up: The subsequent sealing of expansion joints in waterproof concrete structures.

With a diameter of around 5 mm, the B-STING® is screwed into the expansion joint using a cordless screwdriver. Injection is carried out on the side of the joint facing the water using a flat-head gel nipple and the screwed-on injection pipe.

Once the injection process is complete, the injection pipe is removed while the B-STING® remains in the component and seals the drill hole permanently and water pressure-tight.

Benefit from this innovative solution to ensure a reliable seal. Discover the advantages of the B-STING® joint injection needle!

UPDATE! - Specialist brochures & Technical Opinion

We have recently published three new technical brochures and a comprehensive technical statement, which have been completely revised.

These are available for download. Of course, we will also be happy to send you printed copies - please do not hesitate to contact us!

Water-impermeable concrete structures

Sealing with injection methods Solutions even for difficult cases

****NEW**** is the information on repairing leaking expansion joints with the innovative B-STING® joint injection needle, B-PROFILE® injection formwork, B-JOINT® flexible hose profile, DESOI Quick Seal and the detailed documentation of injection work with our DESOI w.i.l.m.a. - data logger.

DESOI w.i.l.m.a. - Data logger

Documentation of injection processes

The DESOI w.i.l.m.a. recording and documentation device is the **third generation** of tried-and-tested, tried-and-tested technology. The permanent monitoring of injection processes ensures that the parameters defined in the planning are adhered to, monitored and documented in a way that is customised to the respective structure.

This control system is available in four different versions and safeguards all your injection processes.

Brochure B-STING® joint injection needle

The B-STING® joint injection needle enables simple and safe sealing of sealing joints in tunnels, especially in segmental tunnels. The joint is sealed by screwing in the B-STING® with a cordless screwdriver and injecting an acrylate or polyurethane-based filler. The B-STING® remains in the component and ensures a permanent seal. **Now with detailed working processes.**

NEW is the use of the B-STING® joint injection needle for sealing leaking expansion joints in all watertight concrete structures.

DESOI Ram Injection Lances - Injections into the subsoil

TECHNICAL OPINION

Description and methodology - Basics and recommendations for planning and execution

The technical statement provides you with important information on injections into the subsoil, including both the description and the methodology. To ensure the highest quality and safety, the documentation contains basic recommendations for the planning and execution of projects. Together we can create sustainable solutions in the construction industry.

DESOI on tour – STRONG TOGETHER!

Our company outing to celebrate the 45th anniversary of the company was a complete success and we will remember it for a long time to come. Even the bus journey to the location, which had been kept secret until then, was a source of much anticipation and excitement.

In the sunny city of Fulda, a city game welcomed us in which we had to solve a fictitious criminal case together. The team spirit was awakened and we all had a lot of fun.

Afterwards, we enjoyed delicious food and drinks at the Parkhotel Fulda. The speeches by the management were inspiring and once again emphasised our team spirit and the great successes of the last 45 years.

We rounded off the evening with music and dancing in good company. It was simply a day full of fun, pride and joy.

Here's to many more successful years!
